

BUTTERFLY

Urinal

Design: Sam Gullam

Butterfly Urinal, London

The Butterfly was designed in cooperation with City of Westminster as a solution to on street urination.

By day the Butterfly is part of the street furniture scene and by night it provides much needed toileting facilities.

The Butterfly is a contemporary design in stainless steel with two cubicles. Its small footprint allows it to be used in city centres and it has been designed to have minimal disruption to pedestrian flows by nature of its sleek profile.

TECHNICAL INFORMATION BUTTERFLY

General information

Each Urinal is connected to water, sewerage and electricity, and is self-flushing. The user benefits from a discreet partial enclosure that provides a clean, safe and easily accessible toilet facility.

The Urinal opens during the night and is a successful system in reducing street urination.

Our toilet buildings are delivered pre-fabricated for installation on an integral foundation. Danfo supplies all the drawings and technical specifications needed to make a planning application together with foundation details.

Service and maintenance

The On-Street Urinal, like all Danfo products, is available either by capital purchase or on lease terms. It can also be packaged with the Sanirent® Concept.

Within the Sanirent® concept, Danfo take care of daily cleaning and maintenance ensuring that the visitor enters a clean and hygienic, high standard toilet facility.

Foundation and framework

Foundation

The unit comes with its own integral foundation.

Walls and Ceiling

Walls and ceiling are made of insulated stainless sheet with broomed surface and insulation.

Floor

The concrete slab is covered by an acid-proof stainless steel floor.

Doors

The doors are made of decorated designed stainless steel.
