

MOBILE TOILET CABINS

- Technical specification

Construction

Sandwich construction of an insulated polyurethane core covered with plastic coated aluzinc sheet on both sides. Roof made of galvanised steel plate with riveted edges. In the waste tank model, the toilet module of non-skid patterned, fibre glass reinforced plastic polyester is seamlessly attached to the walls. The door is made of the same material.

Equipment

The toilet cabin comes complete with electrical installation - for heating, lighting and ventilation. A 3-pole mains inlet for connection to 1-phase 240V/16A electrical outlet. The cabins are equipped with GFCI (ground fault circuit interrupter). Washbasin with water tap (not TV4-versions), waste paper basket, toilet paper holder, clothes hook, mirror, locking device. 25 litre fresh water container with foot pump in the T500-version. Ceramic toilet bowl in the WC-version. Lifting eye bolts.

Ventilation

Disk valves for natural ventilation. The waste tank is separately ventilated.

Waste tank

The waste tank is constructed of rotation cast plastic which is temperature resistant and is an integral part of the structure. The waste tank requires charging with water and disinfectant prior to use and requires emptying periodically. Drainage by sludge suction.

Waste tank capacity

Model: T500 approx. 1600 visitors
 TV1 approx. 1600 visitors
 TV4 approx. 2000 visitors

Wheel chassis

TV1: One-axeled, brakeless galvanised wheel chassis with towing device for a 50 (2") mm tow hook. Detachable towing fork.

TV4: One-axeled, galvanised wheel chassis with brakes and towing device for a 50 (2") mm tow hook.

Colours

Exterior standard colours: green or light grey.

MOBILE TOILET CABIN - Exterior

Danfo Toilet cabins at the Formula-1 race track in Bahrain.

T500
Toilet cabin with a 500 litre waste tank.

WC
Toilet cabin connected to water supply and sewer system.

TV4
Toilet cabin with wheeled chassis and four toilet cubicles. Wheel chassis is also available for a single cabin unit.

MOBILE TOILET CABIN - Interior

T500 with waste tank

The floor and toilet seat being cast in one piece of fibre glass reinforced composite makes the T500 model very durable and easy to clean. The cubicle is furnished with a washbasin with tap and one 25 litre water container. Can be fitted on a wheel chassis (TV1).

WC-model

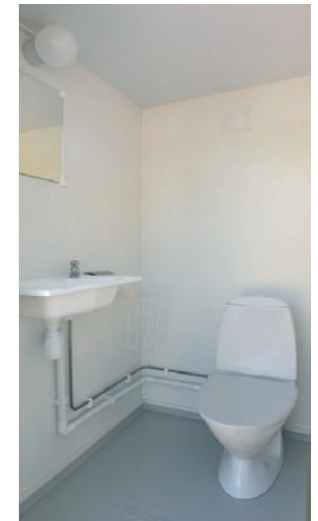

The WC-model is furnished with a water flush ceramic toilet bowl and a composite washbasin. To be connected to water supply and sewer system.

TV4

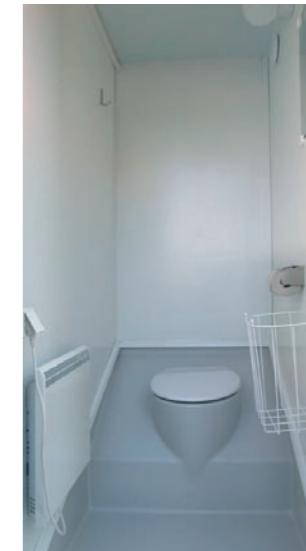

The interior of the TV4-version is one cast piece similar to the one in the T500-version, however the cubicles are smaller and not furnished with washbasin and water container.
